mond; has the confidence
and support of pioneers.

VOL. XIX

RICHMOND, CALIFORNIA, FRIDAY, NOVEMBER 24, 1922

No. 47

Chain of Banks From
Oakland to RichmondMercantile Trust Co.
Have Started Ball
Rolling

It is announced by the Mercantile Trust Company of California that the company will open its branch bank at 23d and Macdonald tomorrow at 10 a. m.

J. H. Plate, formerly with the Bank of Richmond, has been appointed manager.

The bank occupies the corner next to Burg Bros., the latter having vacated their former quarters and taken the rooms adjoining the bank.

The Mercantile Trust Co. is establishing a chain of banks that will serve nearly all the outlying districts from Oakland to Richmond.

The bank established at Albany exceeded all expectations, and Manager Nevin reports the number of depositors increasing daily, the first day of the opening 155 new depositors starting accounts.

New Postmaster
For Pinole

Announcement has been received from Congressman Charles F. Curry that George W. Fraser has been recommended by Curry for appointment as postmaster at Pinole. The appointment will be made by President Harding within the next two weeks. Fraser was for many years constable at Pinole and is now engaged in the grocery business there.

Bridge Company
Prepare Plans

The San Francisco Transit company is preparing bridge plans so that it can start work on the bridge across Carquinez straits and have it ready for traffic early in 1924.

The board of supervisors will decide on Monday, December 11, whether or not to grant a franchise.

Builders Can Use
Hollow Tile

The city council Monday night passed an ordinance permitting builders to use hollow tile in the erection of residences. This will no doubt give the building campaign an active boost, as hollow tile are in demand. When veneered with certain materials the walls present an artistic and attractive appearance.

SHE KNEW HIM

Mr. X., a well-known writer and advertising expert, came to lecture before the university class of students who were aspiring to the fame that he had already reached.

A fair young coed was delighted with the lecturer and was evidently an ardent admirer. She turned to a young woman, sitting beside her and gurgled: "Oh, don't you think that Mr. X. is just wonderful, and he's so handsome. I'm simply wild about him." The young woman smiled and agreed that he was "pretty nice." The coed's enthusiasm increased as the lecture progressed, and every now and then she turned to the young woman and voiced her admiration. Finally, impatient with the young woman's calm, quiet, reserved answers, she asked, "Don't you think that Mr. X. is wonderful? Have you heard him before?" "Oh, yes," answered the young woman, "you see, I'm his wife."

Subway Work Going
On Under Handicap

The subway contract is a "tough one," and Contractor Page will have some rough winter weather to contend with before he completes the job.

Page has excavated the north side of the subway and the car track will be shoved over to that side. Excavating on the south side will then begin. With good weather the job may be completed in three months.

Sheriff Goes East
After Embezzler

Undersheriff W. M. Veale left yesterday for Dayton, Ohio, for the purpose of returning C. M. Entler who was arrested in that city several days ago on a charge of embezzlement preferred against him by H. H. Bruns, Antioch garage owner. Entler is alleged to have purchased a Mitchell touring car from Bruns and then to have left the state with several hundred dollars still due on the car. Entler was arrested several days ago in Dayton.

District Attorney A. B. Tuning has prepared extradition papers.

"WASHING SOILED LINEN"

Popularly used to express airing of unpleasant private affairs or family quarrels in public, the phrase "washing soiled linen," finds its analogy in the fact that both are matters for disposition in the privacy of one's home.

The expression comes down to us as one of the brain children of Voltaire, the famous French satirist. The occasion for its origin is said to have taken place in 1740, when General Maunstein wrote to Voltaire asking to be vindicated publicly of accusations made against him.

Voltaire happened to be occupied in answering the appeal of Frederick of Prussia to help him straighten out one of his dilemmas. So he replied to Maunstein:

"The king has sent me some of his dirty linen to wash. I will wash yours another time."

CHICKWEED ON TREES

One of the first flowers to greet us in the spring, and one that blooms along into early summer, is the dainty giant or great chickweed. One cannot pass this species of chickweed without noticing its pretty white flowers. Sometimes the seeds of this plant find their way into some crotch of a tree. Then we have the pleasure of seeing a fine specimen flourishing quite a distance up from terra firma and often doing better than those on the ground.

AN ARTFUL DODGER

"I believe I'll write another column on 'Whither Are We Drifting?'" remarked the editor of the Chiggersville Clarion.

"Are you hard up for something to write about?"

"Exactly. As nobody seems to know whither we are drifting, I can grind out a column and leave the question with my readers."—Birmingham Age-Herald.

SUGGESTED A PELICAN

Briggs—That famous soprano you had at your dinner party last night sang like a bird.

Griggs—Like a bird is right. I was conscious of her bill the entire evening.—Boston Transcript.

If He Could Charge Them Off.
The man who has a wife and two or three daughters is lucky if he can get himself judged by their clothes.

Illustrated Lecture on
Mt. Lassen by
Scott

A lecture of educational as well as entertaining value is announced for this evening at the Washington school auditorium, when Winfield Scott, promotion agent of the Western Pacific, will give an illustrated talk on "Mt. Lassen."

San Ramon to Have
Big Elk Night

San Ramon Valley night will be a big event at the meeting of Richmond Lodge of Elks on December 19 when a number of residents of that section of the county will be initiated into the order. County Assessor George O. Meese, James F. Hoey and Charles Bulger, Martinez members of Richmond lodge, have announced that the up-country Elks will take charge of the entertainment features on that evening.

FLANK ATTACK IS DEADLY

No Stroke More Dreaded by Military Commanders—Abundantly Shown in History of Battles.

The flank attack is one of the deadliest moves known to warfare. An army is, by its nature, a linear thing. Not only is it strung out man by man, its mind and its power of action are also most hopelessly one-track.

An army in action usually consists of men breast to breast, all facing one way. Before it is its zone of effectiveness, its raiding limits, its charging radius, and the ground which it can cover with projectiles. Behind it lie its communications, and the whereabouts of the most that can never be many hours distant.

While an army is engaged it turns only with great difficulty. It has only a definite quantity of energy to expend; if that goes into maneuvering it cannot go into fighting. An enemy who appears on an army's flank, therefore, finds a foe particularly assailable. The latter's effective zone may easily cover a portion of the army and inflict severe damage before the necessary readjustment can be made. A flanked army knows this. It is therefore usually true that a panic results once an army is turned.

The history of battles is full of such instances. Caesar's Commentaries frequently note: "Our cavalry appears on their wing, they turn their backs, a great slaughter ensues."

HELMET OF THE HEBRIDES

Island Has Peculiar Formation and Offers Very Slight Attraction to the Visitor.

A pointed casque, white with the host of sea birds that nest upon it, is all that remains of the lofty mountain that in some long past era dominated the now sunken valleys west of the Hebrides. Seen from the west, the rock, which rises 60 feet above the ocean, resembles a huge spiked German helmet. The waves have broken down a part of the seaweed-covered visor, and the upper part of the helmet is deeply dented; but the point of it is still sharp and frequently serves as a resting-place for one of the huge albatrosses of the north. The helmet appears to have been cloven in two as if with a terrific blow from a saber; the eastern face is a vertical wall. The island is called Rockall, and is quite barren. It is situated in an unfrequented stretch of the ocean and is more than 280 miles from the nearest land. Few persons have ever visited it. Indeed, only four landings are recorded.

Twenty-seven property owners have petitioned the city council for a fire hydrant at 37th and Barrett.

THE TERMINAL, Richmond's industrial newspaper.

Granting of Franchise
to Ferry Company
Continued

Martinez, Nov. 24.—The matter of granting a franchise to the Richmond-San Rafael Ferry Co. for a new wharf and dock at Point Richmond was continued by the board of supervisors to Dec. 4. It is said that the protests against the franchise have all been withdrawn, the question at issue having been satisfactorily settled.

To the Memory of
Eugene Field

With pretty ceremony, which included the singing of "Little Boy Blue," and "Sleep Little Pigeon," a beautiful monument to the memory of Eugene Field was recently dedicated in Lincoln Park, Chicago. The monument is the work of Edward McCarran and was paid for by penny contributions of school children, \$30,000 being saved by them, requiring many years to raise the fund.

There are a number of old Denver associates of Field's scattered about the coast, who worked with him on the staff of the Denver Tribune in the early 80's. The memoirs and incidents of history relating to Field's experience in the Queen City of the Plains would make an interesting book—for Field was in a class by himself—there has never been but one Eugene Field.

Field left Denver in '83 and accepted a position on the Chicago News, his daily contribution to that paper being a column of "Sharps and Flats," short paragraphs set in agate type, beginning with a raised brevier line.

Melville E. Stone, who was editor of the News at that time, delivered the dedicatory address at the unveiling of the monument, Field's grandchildren performing that significant part of the ceremonies.

Good Philosophy—Take Some.

Man is dependent socially and economically upon his fellow men. The more acquaintances he has the greater will be his pleasure and happiness in giving and receiving the benefits that come from associations. Absorption in business, in one's own affairs to the exclusion of others, is a mistake; that invariably has its reaction sometime in one's life. Individuals should spend more time getting acquainted. The successful politician does not refer to the city directory to get acquainted with his neighbor. He can call them by their front names. The man who is so engrossed in his own business that he has no time to "visit" and get acquainted loses out, unless he has "jack" to lend.

Predicts Catastrophe.

Dr. Kenneth Saunders, in an address to a group of U. C. students meeting with the international student forum in Stiles hall Thursday noon, said:

"The people of Russia are intellectual leaders of Europe, and the hope of Europe lies in the young men who, though they need better educational facilities than ever, are facing a ruin of every social, religious, economic and political structure in this land."

A Hayward orchardist named a new variety of apple the "Hiram Johnson." Here's an opportunity to go further in naming fruit. Since election we might specialize on the lemon.

THE TERMINAL can print it for you. Call up Richmond 132. Print shop at 208 Macdonald.

Franklin Canyon Strip
Will Soon Be
Completed

Supervisor Zeb Knott states that work has been started on the western strip of the Franklin highway, which has been diverting travel via the tunnel road, and that Contractor Grow will rush the work through in short order. When completed this will close the gap and make Franklin Canyon highway one of the most popular drives in Central California. It will be a great benefit to Richmond, and divert travel Richmond way, instead of motorists taking the circuitous route.

Contra Costa's Good
Road Builders

The Martinez Gazette recommends Ralph R. Arnold for chief state highway engineer, and says Gov.-Elect Richardson could make no better choice, as the roads of Contra Costa county stand as mute evidence as to Arnold's qualifications in road building. There are a number of excellent road builders in Contra Costa county, Supervisor Zeb Knott of Richmond having demonstrated his efficiency in this line. But why recommend them for a state job? We need 'em right here at home.

VICTIMS OF POPULAR ERROR

Unfortunate People in Sweden Suffered Because of the Then General Belief in Witchcraft.

Dalarna was the principal scene of witchcraft trials which are so ugly a blot on the reign of Charles X. One of Sweden's best rulers. Persons, mainly women, were accused of carrying away children on cattle and broomsticks to Satan's headquarters, Blakulla, described as "a splendid palace, shining like fire." Here the names of new arrivals were entered in a black book in letters of blood, and they engaged both in ordinary occupations and in loathsome orgies, while their food was brought to them by animals from the woods. The convictions were often based on confessions of the most grotesque character made by demoralized, half-mad children, though the bulk of the clergy and authorities firmly believed in them.

The pine-clad Karingberg (Hag hill) just north of Leksand, crowned in these days with an observation tower for tourists, was the scene of the burning of eight women in 1671, and a spot on the high road outside Mora is indicated on which fifteen were burned two years earlier.

Easter cards in the Mora shops, depicting witches bound skyward on broomsticks, accompanied by black cats and drinking from beer bottles, are a harmlessly intended, if not particularly thoughtful, manner of commemorating these wretched people's fate.

LAKE OF BEAUTY

The legend of Iracema, princess of the Tabajaras, in Brazil, is a tale of the northeastern state of Ceara, and of Martin Moreno, who married Iracema (in the story), and who (in history) founded the colony in 1611.

Iracema leaves her people and her high place among them, and goes with the white warrior; she fights by his side against her own brothers. While Martin was away on the hunt Iracema used to swim "among the white herons and the red jacanas," in Lake Porangaba, called ever since the Lake of Beauty, because it had bathed the most lovely daughter of the race of Tapan.

Why is the land of beach and forest where she died now called Ceara? From the ara, parakeet, that sings in the tree above the place in the river bank where Martin left her.

Richmond to Hold
More Bond ElectionsHollow Tile Brick to
Start Big Building
Boom

The first hollow tile residence in Richmond, under the first permit issued under the new building ordinance that permits this type of construction is to be erected by James T. Nabrett, local architect, in Roosevelt avenue between Tenth and Eleventh streets. It is to be a two-story cottage of the most modern design, with walls of hollow tile, concrete foundation and girders. Nabrett is directing the work himself and promises a dwelling that will be one of the finest in the city. The building permit gives the cost of the building as \$6000.

MAY HAVE BEEN CONTINENT

Recent Position of "Lemuria" Has Been a Subject of Contention for Many Years.

"Lemuria" is the name given a supposed continent in the Indian ocean belonging to a former geological age—the possibility of such a continent having existed being assumed by some of the 200 geographers "to explain the ethnological unity of the human family."

Lemuria was "so called because it included Madagascar and the islands of the Indian ocean; home of a genus of mammals known as 'lemurs,' according to the New Standard Dictionary. The Britannica says that "it has been suggested that a land, 'Lemuria,' once connected Madagascar with the Malay archipelago, and that a northern extension of the Antarctic land had once united the three southern continents," and, in speaking of Rodriguez (or Rodrigues), an island in the Indian ocean: "The island was at one period believed to consist of granite overlaid with limestone and other modern formations, and its supposed formation caused it to be regarded as a remnant of the hypothetical continent of Lemuria."

FAMOUS STONE

Talbot Mundy tells this in Adventure magazine:

"The English coronation stone in Westminster abbey is the stone on which Jacob laid his head at Bethel, when he had that famous dream, which some thinkers say explains the whole metaphysical foundation of the universe, and others say was probably produced by dope. (Myself, like Disraeli, am on the side of the angels.)"

In the stone there are still the iron rings, which Moses caused to be fixed in it so that the men who carried the Ark and other temple paraphernalia could pass rods through the rings and handle it easily. It also has a crack in it, which is asserted, not plausibly I think, to confirm the story of one of Moses' miracles. I believe that the Ark of the Covenant is certainly in Ireland, and that it will one day be found there, at or near Mount Tara."

HERE'S A TWO-YEAR CLOCK

One of the limitations of the ordinary desk clock is that, frequently through oversight, it is not wound up, and consequently stops. This generally causes annoyance and perhaps the loss of a business engagement. A new electric clock has been designed to overcome this. It is arranged to run for two years on a small battery of dry cells. The clock is of the average desk type and has two wires leading to the batteries. These occupy small space and may be placed in the bottom drawer of the desk. The clock, it is claimed, will require no attention until the batteries give out.

Claim No Opposition
to Much Needed
Improvements

More elections!
Two of them coming up.
The \$350,000 bond election will be held next Tuesday, November 28th.

The freeholders election will be held Tuesday, December 12.

Three elections within nearly as many weeks is going some, but Richmond is growing so fast she must have them.

The \$350,000 bond issue is for a municipal hospital, \$100,000. Playgrounds and parks \$150,000. Public baths \$50,000.

Municipal auditorium and gymnasium \$50,000.

It is said by those who have taken a "straw vote" that the city hospital and bath house propositions will carry at this time.

Many claim that this is not the "psychological" time to put over bonds—no matter how "urgent." Some of the bond "bugs" claim the entire "group" will go over easily, figuring that the kickers and the apathetic will not vote, and that the advocates of the bonds will have "easy sailing."

The public "swimming hole" is strongly supported by all, especially the boys.

City in Brief

Police here have declared war on speeders who race down Standard avenue, Barrett avenue, and other streets.

Attorney Daniel Barton, former pioneer resident of Richmond, is practicing law in San Francisco.

Mrs. Mildred E. Gonner of Richmond has assumed the duties of county school attendance officer under a rec at appointment.

Mrs. M. S. Dority of Eaton, Colorado, is making a short visit with Mrs. E. H. Difen, of No. 22 Idaho street.

Ford Auto Burned;
Lighted Match Did It

Three Contra Costa men were traveling in a Ford on the highway near Peyton when the machine's lights went out. With a lighted match, one of the occupants of the car began a search for the trouble. He found it and also more trouble. Gas from the carburetor ignited and the car was damaged to the extent of \$300, the fire department being called upon to save the remains.

THE MIDNIGHT SUN

At certain seasons of the year, owing to the position of the earth, there is a territory in the Arctic circle where the sun is above the horizon for weeks or months, continuously, shining at night as well as during the day. Thus, at North Cape, Norway, the sun is above the horizon continuously from May 13 to July 29, and at Bodo, not far from the Arctic circle, from June 3 to July 7. Even in the extreme south of Norway there is no darkness from the end of April to the middle of August. In the winter, on the other hand, the sun is not visible at the North Cape from November 18 to January 23, and at Bodo from November 15 to December 27. There is only a twilight at midday. In the extreme south of Norway the sun is above the horizon for 6½ hours daily at midwinter.

WORKS FOR CHILD MUST KEEP WELL

Mothers in a Like Situation Should Read This Letter from Mrs. Enrico

Chicago, Illinois.—"I took Lydia E. Pinkham's Vegetable Compound for a serious trouble. I had tried doctors and all said the same—an operation. At first I only felt the pain on my left side, but later I seemed to feel it on both sides. I am a power sewing-machine operator and have a little girl to support. I work in a tailor shop and that line of work has been very slack this year and I am home part of the time. I do not like to take any chances, so I consulted my friends, and one lady said, 'Take Lydia Pinkham's medicine,' so I did. I have felt better right along and am in good enough health to go to work. I recommend your Vegetable Compound and Sanative Wash to all."—Mrs. MARY ENRICO, 459 N. Carpenter St., Chicago, Illinois.

Often the mother is obliged to support her children and good health is necessary. Lydia E. Pinkham's Vegetable Compound is just the medicine you can depend upon. It is a medicine for women's ailments and the relief it brought Mrs. Enrico it may bring to you. Keep well by taking Lydia E. Pinkham's Vegetable Compound.

Coated Tongue Nature's Warning of Constipation

When you are constipated, not enough of Nature's lubricating fluid is produced in the bowel to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and thus replaces it.

Nujol is a lubricant—not a medicine or laxative—so cannot gripe. Try it today.

SQUEEZED TO DEATH

When the body begins to stiffen and movement becomes painful it is usually an indication that the kidneys are out of order. Keep these organs healthy by taking

LATHROP'S GOLD MEDAL HAARLEM OIL CAPSULES

The world's standard remedy for kidney, liver, bladder and uric acid troubles. Famous since 1896. Take regularly and keep in good health. In three sizes, all druggists. Guaranteed as represented. Look for the same Gold Medal on every box and accept no imitations.

SPOHN'S DISTEMPER COMPOUND

Are your horses coughing or running at the nose? If so, give them "SPOHN'S." A valuable remedy for Coughs, Colds, Distemper, Indigestion, Pink Eye and Worm among horses and mules. An occasional dose "tones" them up. Sold at all drug stores.

SPOHN MEDICAL CO., GOSHEN, IND., U.S.A.

Her Choice.

Rastus (to his girl)—Ah's gwine down to dat new sto' to get some candy. Dey's got candied cherries, strawberries an' I don't know what all. His Girl—Man, bring me a chocolate coated watamelon an' Ah's yo' foe life.—Boston Evening Transcript.

If given three guesses could you guess why a married man seldom has any use for a phonograph?

It is said that political graveyards are never robbed, yet there are a lot of dead ones in politics.

MURINE

Refreshes Weary Eyes When Your Eyes Feel Dull and Heavy, use Murine. It is the only eye medicine that cures eye troubles. Sold and Recommended by All Druggists.

Uncommon Sense . . .

By JOHN BLAKE

MANAGE YOURSELF

A GREAT singer, who has to spend about eighteen hours a day taking care of his health and his voice, which are his capital, needs a manager, and has one.

A great actor, whose every minute is required to continue being a great actor, also needs a manager.

We take it that you are neither a great singer nor a great actor, because you belong to the vast majority of human beings.

Therefore, while you need a manager, too, you don't need to hire one. You can be your own.

This is true, whether you are your own boss, or what the socialists call a wage slave.

If you are a wage slave you will to some extent have to submit to the management of the man who is set over you.

But he can only manage you in working hours, and he can't manage your mind at all. And it is your mind, and the way it is managed, that will

Something to Think About

By F. A. WALKER

THE GREATEST ART

IF YOU will look around you with undarkened vision, without prejudice in your heart, and with a mind bent upon getting at the truth quite regardless of the pang it may cause your pride, you will discover that the greatest art of all arts is the art of pleasing others.

And this art, though simple as it may appear on the surface, is the most difficult art in the whole world of human practice.

It means at the very beginning of its acceptance the subjugation of spirit and passion, the conformation of will, talent and effort to the free reception of others who shall eventually pass upon your work and give it approval.

Like you, the judges are human, but their judgment, however it may affect your purse or temper, is final, inasmuch as it opens the door to hope or imprisons you with despair.

You may paint a beautiful picture, but if it fails to please others nobody will praise or buy it. And you proceed to nurse your disappointment with ill-humor, oblivious to the fact that the painting is deficient somewhere in color, drawing or atmosphere of the quality that gives satisfaction.

But the true artist, in whatever field of human endeavor he may be seeking success, turns each failure to account by studying it good-humoredly and checking up its defects.

He turns the first canvas to the wall and begins to paint again, carefully avoiding previous mistakes.

And it is in such action as this that there is shown the true mettle of the man or woman who is determined to forget self by pleasing others.

It may be a difficult lesson to learn, and it may take years to comprehend all its intricacies and minute details, but when it is once mastered, old heartaches disappear like the heavy frost in the shining morning sun.

To please others ought to be the chief purpose of every young man and woman dependent on his or her physical or mental effort for livelihood and success.

Though an extremely trying thing to do, calling for patience and sometimes great humility, it frequently

make or break you before you get through.

Take over that job yourself. If it is an unruly mind, make it law-abiding. If it is a roaming mind, given to wandering over all sorts of subjects when it ought to be confined to one, discipline it.

Keep it on the job it ought to be doing. Teach it to concentrate and make it practice this new accomplishment.

If it is a lazy mind, force it to work and to work hard. If it objects and acts as if it might crack under the strain, don't worry about it. Keep it working and it will soon learn to do its work without getting fagged.

While you are managing your mind, manage your body, too. Make it control its appetites, and take cold baths, and tackle hard work without flinching.

Don't let it overeat or neglect to get plenty of sleep, or do any of the foolish things that bodies will do if they are permitted to have their own way.

Mind and body well managed will soon be worth more to your boss and, consequently, more to you. If your boss won't pay the extra value, get another boss; but be sure first that the extra value is there. It is easy to think you are worth more than you are, and to underestimate the boss' judgment in that respect.

After you have been managing yourself for a while you will know how to manage others. Then, when you get a chance, you will be able to improve it. You will find the job difficult at first, but pleasant and profitable afterward. Try it and see if this isn't true.

ABSENCE

By WILL M. MAUPIN

HOW big a little house can be When all have gone away And left no one at home but me; How dreary, grim and gray The shadows are at eventide. When lone and tired I come And have no one to sit beside Me when at last I'm home.

The hall seems leagues of distance wide. Each room a vast estate; Dark forms in dusky corners hide And terrors lie in wait. Deep silence reigns, and over all The lonesome shadows creep; I list to hear a soft footfall From out the silence deep.

No welcome laugh, no smiling face, No eager, running feet To meet me as I near the place; No kiss from lips so sweet. A barren isle in widespread sea; A rock in desert wide; No hands that beckon unto me Near home at eventide.

And yet, ere morning sun awakes I feel a presence sweet; Dream faces dreary fancy breaks And bring a joy complete. I feel the touch of little hands, See smiles of childish glee; And as from far-off fairyland My children come to me.

O'er low-lying hills and valleys wide, Far from the city's strife, Midst country scenes where joys abide Are children dear and wife. So what care I if dark and drear The cottage seems to be, If brown and strong my kiddies dear Soon hasten home to me!

(Copyright by Will M. Maupin.)

SCHOOL DAYS

bestows upon those who have the fortitude to overcome rewards far in excess of their greatest expectations, and a joy whose gladness cannot be expressed in words.

(Q. 1922, by McClure Newspaper Syndicate.)

Carelessness and Poverty. Childish, imbecile carelessness is enough to render any man poor, without the aid of a single positive vice.—Francis Wayland.

(Q. 1922, Western Newspaper Union.)

No Escape for the Rogue. There is no den in the wide world to hide a rogue. Commit a crime, and the earth is made of glass.—Emerson.

Daily Thought. We always may be what we might have been.—Adelaide Proctor.

ONCE IS ENOUGH

Corned Beef Hash.

Chop two parts of cooked potatoes and one part corned beef very fine, season with grated onion, pepper and salt, heat thoroughly, adding a little butter and a grated pepper shredded. Spread thinly on thin slices of buttered toast and slip a poached egg on each; sprinkle with pepper and salt and minced parsley.

Perfection Fruit Cake.

Take the following ingredients: two cups of brown sugar, one cup of butter, one and one-fourth cups of buttermilk, four cups of flour, three eggs, one teaspoonful each of cinnamon, soda and nutmeg, one-half teaspoonful of cloves, one and one-half pounds of raisins, one pound of currants, one-fourth pound of citron, one

ROAD BUILDING

CLEAN MATERIALS FOR ROAD

Builder Gets Perfect Concrete Aggregate Along Route of Job by Ingenious Method.

Elimination of the long haul with the assurance at the same time that sand and gravel used in concrete road construction would be thoroughly clean and free from organic impurities was achieved in an ingenious and economic manner on a section of the Denver-Morrison highway. Comparatively shallow deposits of both required components of the aggregate to be used in mixing this concrete were discovered in the bed of a small stream which flowed within a quarter of a mile of the job.

The contractor determined to utilize this natural deposit rather than incur the expense and loss of time incident to purchase or preparation of the aggregates in town and consequent long haul to the mixer. As it was necessary to wash and screen his aggregates as well as to elevate for loading into trucks, the contractor decided to attempt these operations all in one move if possible.

Accordingly he obtained a six-inch centrifugal pump and about 800 feet of six-inch iron pipe. A small sump or pit was excavated in the bed of the stream and the intake of the centrifugal pump was laid in the pit. The bottom of this pit was below the level of the ground water in the gravel bar or bed of the creek. The pump took in water, sand and pebbles as large as three inches in diameter from this sump and delivered them through the discharge line which was approximately 700 feet in length to a flat screen on top of the bins.

The supply of sand and stone in the sump was continuously renewed by means of horse-drawn slip scrapers. A screen composed of flat bars was placed across the top of the sump to eliminate intake of oversize stones which could not be handled by the pump. At the end of the delivery line, the water, sand and stone were discharged upon a flat screen having square three-eighths of an inch mesh opening. The water and sand, of

A Novel Method of Washing and Elevating Gravel for Road Construction.

course, fell through this screen while the larger pebbles rolled on over it and thence into a bin for pebbles. Below the first screen was a sand settling box. The water and sand fell into this box and the sand being heaviest, immediately settled to the bottom while the water carrying the dirt and silt escaped through a waste-way in the top of the box. As the sand accumulated in the bottom, it was discharged through gates at periodic intervals into the sand compartment of the bins beneath.

The force of the water, sand and stone passing through the pipe line was sufficient to scour every particle absolutely free from dirt and impurity of every kind. The pump was driven by a 60-horsepower traction engine.

ROAD-MAINTENANCE TRUCK

Implement Carries Concrete Mixer and Combination Bin for Cement, Sand and Gravel.

A highway-maintenance truck, described in the Popular Mechanics Magazine, has been put into operation in California, which would seem to be the last word in complete equipment. It carries a concrete mixer and combination material bin for cement, sand and gravel. Also an air compressor and air tank which can be used for driving a rock drill for road work, or can be used in connection with a water-supply tank as a spraying outfit or fire extinguisher.

There is also a centrifugal pump which can be used for filling the water tank or for pumping out cisterns or caissons. The truck engine furnishes all necessary power for driving the auxiliary equipment at various speeds through a special transmission. Flanged wheels may be substituted if so desired.

Kill Insects by Ploving. Ploving or spading up gardens and truck patches this fall before the ground freezes will reduce the job of fighting insects next season, because stirring the soil at this time of the year kills many grubs and pupae in the ground.

Illuminate Good Roads. A huge illuminated map shows the progress of all state hard roads under construction in Illinois by the state highway division for exhibit at each fair throughout the state.

WRIGLEY'S

for Better Digestion

Few of us chew our food enough. Hasty meals are harmful, but Wrigley's stimulates the flow of saliva that helps the stomach take care of its load.

Eat less, chew it more and use Wrigley's after every meal. It keeps teeth white, breath sweet and combats acid mouth.

WOMEN NEED SWAMP-ROOT

Thousands of women have kidney and bladder trouble and never suspect it. Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

Pain in the back, headache, loss of ambition, nervousness, are often times symptoms of kidney trouble.

Don't delay starting treatment. Dr. Kilmer's Swamp-Root, a physician's prescription, obtained at any drug store, may be just the remedy needed to overcome such conditions.

Get a medium or large size bottle immediately from any drug store. However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

United States Flyers in Lead

Virtually Every World Air Record of Any Consequence Is Held in This Country.

INTEREST IS AGAIN REVIVED

One Year's Record Proves That Federal Licensing of Pilots Would Have Saved Many Lives—Last Year One of Achievement.

Washington.—The manner in which America has assumed the leadership in aviation over the rest of the world comes as a surprise to those people who were under the impression that Europe was leading the world in aeronautics. From the time the Wright brothers, in 1903, were able to demonstrate actual flying until the World War broke out in 1914, European nations made far greater progress in aviation than did America.

It was not until 1917, when America entered the war, that this nation was compelled to begin the colossal task of training engineers and creating production facilities. And with the ending of the war, in 1918, the pressure which forced this expansion was withdrawn, and it was two years later, or last year, before a marked increase in public interest was noticeable, and American aviators began to come into their own again.

The year 1921 is marked by three outstanding aviation events, one of universal and epochal importance. During June and July there were held, 300 miles off the Virginia cape, a series of experiments in the course of which aircraft flown from land bases bombed and sank one after the other, a submarine, a destroyer, a light cruiser, and a dreadnought, the most modern examples of warship construction.

In the autumn the conference on the limitation of armament was held in Washington, and it is asserted that the bombing tests cleared the way, more than any other single event, for a possible solution of the international competition in capital ship construction.

Service Is Widespread.
The most valuable service which aircraft provides is speed, and this is essential in the three classes of use to which aeronautics is catering, national, civic, and commercial. Airplanes are now used for national defense, including army, navy, and marine corps; air mail, forest patrol, coast guard, customs and revenue service, warning and relief in disaster. In civil lines they may be used for city planning, road and building construction, rail and water terminal problems, and fire and police zoning.

In commercial lines, aerial craft are used for passenger service, freight transportation, messenger service in banking, aerial photography, collection and dissemination of news, sport, and pleasure, and commuting. At the

Needle Swallowed by Mother Found in Baby

Three years ago Mrs. Frank J. Schwing of Stockton, Cal., who was Miss Ethel Frick, swallowed a needle two inches long. Two months later she was married. Recently her daughter, Charlotte, 22 months old, began to cry and the mother, investigating, found a little lump under the skin on the shoulder. She probed and found the needle. Neighbors were present when she withdrew the needle. The mother and daughter had never suffered pain from the needle until the child felt it in its shoulder.

Forest in Oregon to Have Moose

Five baby moose, captured in the wilds of the Kuskokwim peninsula in Alaska, are to be used as the nucleus of a moose herd in the Deschutes national forest in Central Oregon. The moose have just arrived in Portland, and this one was photographed after he had landed.

REAL ROMANY

Every autumn, in some unknown manner, a call is sent far and wide over the country to the innumerable gypsy tribes. The call is answered, and the tribes gather at Waverland park, Baltimore, for the annual convention and encampment. These picturesque Romany wanderers are now in Baltimore, recanting stories and tales of travel and adventure. This gypsy woman, more than a hundred years old, has answered the annual call for many years, and ever with the faithful tobacco pipe.

examination and licensing of air pilots. Virtually every world record of any consequence is held in this country. The world's altitude record, speed record around a circuit, seaplane records, endurance records, were all made by American pilots within the last year. One million miles of air-mail flying without a fatality is another record of the last year.

The army air service has perfected many new types of combat and bombing planes, ready for service, far superior to anything in Europe.

Stop Chimneys From Smoking

United States Government Seeks to Encourage Proper Construction of Flues.

LONG BEEN UNSOLVED PROBLEM

For Generations Engineers Have Been Trying to Find Out Why One Chimney Smokes and Another, Just Like It, Does Not.

Washington.—Uncle Sam is trying to stop chimneys from smoking at the wrong end. He would provide a model to make "drawing chimneys."

An investigation has disclosed that in every community there are good chimneys and bad chimneys. The good ones draw and the bad ones do not. Ever since the first half-dozen chimneys were built there have been complaints against smoking chimneys, chimneys that filled houses with smoke from the fireplace instead of carrying it off skyward.

For generations engineers have tried to solve the problem of the smoking chimney, but have never met with a full measure of success. One prominent Southern engineer, who helped to develop the cotton mill industry in the South, devoted money and time to studying the question: "Why do some chimneys built at the same time, out of the same sort of material, and by the same people smoke and others do not?" He had small boys go through hundreds of chimneys and take measurements all along the way of the ones that did or did not smoke, and then he drew a plan of what he thought was an ideal chimney, but it failed to produce the desired results. This engineer admitted his defeat in a pamphlet giving the history of his efforts. Now the Department of Agri-

culture will try its hand on the ancient family worry.

Pulls Hat Off Head.
Experts on the subject of chimney construction tell of certain masons who built chimneys that would draw the hat off of your head if you got near the fireplace. One instance is told in which a pine bark hat in reconstruction days in the South was pulled from a man's head and up and out of a new chimney.

"The prime function of a chimney," A. M. Daniels, assistant mechanical engineer, division of agricultural engineering, Department of Agriculture, asserts, "is to produce a draft that will cause sufficient combustion and carry off the resulting smoke; incidentally it assists ventilation. Many unsatisfactory heating plants and much excessive fuel consumption are due to improperly constructed chimneys, which are the rule rather than the exception. Although many of these are more inefficient than dangerous, yet reports of the national board of fire underwriters show that a larger number of fires are caused by defective chimney construction than by anything else. The annual loss resulting from such fires is greater than the fire loss from any other cause. Poor chimney construction is responsible for smoke pollution of the air, waste of fuel and poor heating."

Government experts report that "the draft depends entirely upon the chimney flue. The better the flue the more satisfactory and efficient will be the operation of the entire heating apparatus. The strength or intensity of the draft is dependent mainly upon the tightness, size and height of the chimney flue."

Gives Scientific Reasons.
Mr. Daniels has prepared an elaborate statement on the subject of "drawing chimneys." He goes into the scientific reasons for the lack of proper draft. He asserts that a "round flue is the most desirable because it offers less resistance to the spirally ascending column of smoke and gases."

It has been found that "large trees located near chimney tops may deflect wind currents down the chimney. This may be avoided by placing the chimney on the opposite side of the building."

"The best location for the chimney is near the center of the building, for when so located its four walls are kept warm; cold winds cannot chill it and cause it to draw poorly," Mr. Daniels asserts.

The department explains that the purpose in collecting this information about chimneys is "to give the householder and prospective builder, and especially the farmer or other rural resident who builds or superintends the building of his own home, a working knowledge of the principles to be observed in planning and building these important parts of the house, which, if they are observed, will go a long way to promote the comfort of the home and insure the safety of the property."

Offers Homes for Ex-Beggars.
Tokyo.—Toyohara Morooka, a local philanthropist, has offered the government a tract of land in Kyushu on which he proposes to build homes for 700 former beggars, whom he has rescued from the streets of Tokyo and other cities of Japan.

Tanlac Put Him Back on Job, Says Davis

"I've never been much of a hand at praising medicines, but I can certainly say something good for Tanlac," said Geo. Davis, 110 Naglee St., San Francisco, Calif.

"I had a bad case of ptomaine poisoning and it came pretty near laying me out altogether. For three months I was in an awful condition and suffering constantly from diarrhea. I became weak all over and was going from bad to worse. I tried everything I knew of, but it was beginning to look like nothing would ever reach my case."

"Then, a friend of mine recommended Tanlac to me. And it's a fact, four bottles have made a clean sweep of my troubles and built me up to where I feel like a new man. I am working every day now and when it comes to recommending Tanlac I can't put it too strong."

Tanlac is sold by all good druggists.—Advertisement.

Novelties.

"Do you think the country needs a new party?" "No," replied Senator Sorghum. "If the old parties keep on modifying their platforms for a few more years, they'll offer all the political novelties anybody could reasonably desire."

DYED HER BABY'S COAT, A SKIRT AND CURTAINS WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her old, worn, faded things new. Even if she has never dyed before, she can put a new, rich color into shabby skirts, dresses, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything. Buy Diamond Dyes—no other kind—then perfect home dyeing is guaranteed. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade or run.—Advertisement.

He Had to Stand It.

Yesterday while I was searick it seemed to me I couldn't stand six days more of it or any more of it. Which reminded me of a remark I once heard a very old man make. He was ill and was telling me of his troubles. Without thinking I said: "I don't see how you stand it." The old man replied feebly: "I have to stand it." There are many disagreeable things we can't get away from; we are compelled to stand them.—E. W. Howe in "Daily Notes of a Trip Around the World."

The Gift House.

There had been a veritable deluge of blotters. For days May had brought her offerings to the teacher's desk—mysterious looking packages which always proved to be the inevitable blotters. Finally in perplexity the teacher called May to her and said, "It's lovely of you, dear, to bring these blotters, but really, I've so many now—"

"Oh, that's all right," was the answer, "we've got so many at home, mamma said: 'What'll I ever do with all these blotters?' Why don't you take 'em to your teacher?'"

Cheap Material.

"Your honor, when we were married my wife said I was her soul-mate."

"Yet, there she stands, charging you with non-support."

"I do," spoke up the wife. "I soon discovered that he had a marked down soul, and it was no bargain, either."—Birmingham Age-Herald.

Common sense is discouraging. It means not to care too much for anything.

Hope is often carried so far as to be ridiculous.

Do you hear the clock strike the night hours?

How often you have heard people say, "I can't drink coffee; it keeps me awake nights!" They've learned from experience; have you?

If you are a coffee drinker and fail to get sound, restful sleep, it means that your nerves are over-stimulated and that health needs protection from coffee's drug, caffeine.

There's no sacrifice in making health safe, as so many thousands have found who have turned from coffee to Postum. It has a delightful coffee-like flavor, and is free from any element that can harm you. As many cups as you like, and no regrets.

Your grocer has Postum in two forms: Instant Postum (in tins) prepared instantly in the cup by the addition of boiling water. Postum Cereal (in packages) for those who prefer to make the drink while the meal is being prepared; made by boiling fully 20 minutes.

The two forms of Postum are equally delicious; and the cost is only about 10c per cup.

ANYTHING TO BE OBLIGING

Little Thing Like That Mentioned

Was Nothing to This Applicant for American Citizenship.

At each hearing where applications of foreign-born persons seeking citizenship in the United States are considered and passed on, incidents come up which add humor to the otherwise serious process. At a recent hearing before Judge W. W. Thornton of the Superior court, Room 1, George Mackay, United States naturalization officer, was quizzing an applicant regarding his knowledge of the inner workings of the government and regarding the history of the United States.

"Who was the first President of the United States?" he asked.

"Washington, D. C.," replied the anxious applicant.

"Just leave off the D. C.," said Mr. Mackay.

"Oh, I don't care," said the applicant nonchalantly, with an accompanying gesture of his hand.—Washington Star.

According to This German Physician, It Is Easy to Add to One's Years of Usefulness.

The gathering of centenarians; which took place the other day recalled the case of the eminent German physician, Doctor Fischweiler, who died recently at the age of one hundred and nine. He often declared that he possessed an infallible rule for securing longevity, which he would reveal to the world in his will. Upon his death, then, this formula was disclosed:

"Put your bed, orienting it by means of a compass, so that you will have your head placed north, and lie in a horizontal position. Sleep solidly with closed fists."

This is the whole secret. This position, it is asserted, brings the body in communication with the great tellurian currents coming from the north and insures an extremely happy blood circulation.

He who is equipped with patience and perseverance is equipped for work.

EXAGGERATED IDEA OF HONOR

Vienna Student Kills Himself Because Unable to Give Enemy Proper Satisfaction.

The recent tragic death of a young engineering student in Vienna shows to what the exaggerated code of honor still upheld in some Continental countries is liable to lead, remarks the Vienna correspondent of the Times.

A few weeks ago the police raided the rooms of the Saxonia Students' association and prevented a duel which was about to take place between two of its members. The duel was no ordinary "mensur" bout, but a serious encounter which was to settle an affair of honor. The quarrel, it was stated, had arisen over a lady. One of the barked duellists, a doctor's son, took the affair very much to heart. The fact that he was unable to give his opponent satisfaction preyed on his mind to such an extent that he decided to take his own life. He wrote letters to his father and his fiancée telling them of his intention, then locked himself in his room and shot himself.

NEW POWER LIFEBOAT

A new motor lifeboat, said to be the largest and most powerful craft of the kind afloat, has been launched for the British Royal National Lifeboat institution. It is called the Barnett twin screw. Practically unsinkable, the Barnett twin screw has as many water-tight compartments as a modern battle cruiser. Her radius of action is anything up to 150 miles. She carries a life-saving net, a line-throwing gun and a searchlight. Her engines are two of the new six-cylinder 75-horsepower motors, and it is said they will continue working even when completely submerged.

AMERICANS LIKE "MOVIES."

The United States has nearly one-half of all the motion picture theaters in the world.

HARSH IN HIS JUDGMENT

Traveler Evidently Was Peeved at Seemingly Unfriendly of Pioneer Circuit Rider.

In the early sixties the West immediately on the other side of the Mississippi river was sparsely settled. A traveler in this country met few persons in the course of a day's journey, and so, as a rule, welcomed the appearance of a stranger, especially if the stranger was a congenial traveling companion. These were times, too, when Mr. Volstead would have been unpopular, when every hardy pioneer kept twists of home-grown long green in his jeans and a flask of unadulterated "red likker" about his person.

It was in such a day that a pioneer circuit rider was making his way cross-country on a new circuit. Encountering a native traveling in the same direction, he hailed him. The stranger seemed pleased to welcome a companion, and at once offered hospitality in the form of a flask. On the minister's refusal to imbibe the spirits, a "chaw" from an ample twist was offered. This also was politely declined, whereat the native turned on him abruptly and asked an astonishing question: "Might ye eat hay, then?"

Puzzled at this question, the parson replied that he did not eat hay. "Then ye're not fit companion for man nor beast," the native declared, and rode away.—Exchange.

The observations of the conservator of forests for southern Nigeria, held to be an eminent authority in the matter, indicate that the mahogany tree grows much more rapidly than the number of so-called annual rings suggests. He thinks that they show three or four well-marked zones of growth each year, corresponding to the four seasons. Both forest trees and those grown in the botanical garden exhibit the same phenomenon. On the site of the town of Ijaye, destroyed sixty years ago, a forest has grown up containing mahogany trees with trunks exceeding ten feet in girth.

Specialist Tells How He Keeps John D. "Pepek Up"

Now comes the presumably best trained physician of the land—except "Admiral" Greyson and "Brigadier General" Sawyer—and explain how the breath of life is kept in the body of Mr. Rockefeller. One wonders whether it is worth being alive under the rule of specialists.

Think of going to church in the east in July, clothed in double flannels, overcoat and arctic over-shoes! Consider that doughnuts dripping from the hot pan, mince pie, cracklings and spare ribs are taboo. What further interest has he in the part of the bird that goes over the fence last? Why, he could go to the movies every night in the week and not feel it! He could attend the cabarets, judiciously; and baseball games; and—everything once in awhile.

We'll bet Henry Ford does, and he's only a little bit better off than Mr. Rockefeller.

But no, his physician has got hold of him—probably takes his temperature twice a day, and has the nurse count his pulse before and after meals, which might not be so bad if he was a peart young thing.

The trouble is, how is he going to think of anything but his health?

Labor in the Saddle

In England labor has taken over the ship and will occupy the bridge, at a moment, too, when the promise of a storm is more than plain, and navigation is all too risky.

Good luck to the hearty Englishmen who have so long stoked the fires, stood at the throttles, taken on and discharged the cargoes, and who have manned the guns when scuppers ran red. They are in a sense mutineers—lawful mutineers. Their worst enemies are among their own ranks.

No man can come directly from the stockhold and navigate a ship. The most ignorant will be the most noisy.

Why Not Censor Them, Like They Do (?) the Movies?

Every once in so often Mr. Hume, the energetic, or some one in the showman's line, produces on the U. C. campus a public performance that many worthy people loudly protest against. The mother's association takes up the matter, and appeals to the regents. The newspapers exploit the affair. The fraternities and sororities buzz. At once every student goes to see the performance, bent on discovering the naughtiness. Possibly much harm is ultimately occasioned. Much impure seed may be sown to lie dormant, and in after years grow and cause trouble. Maybe it would be better if the performance on the campus were passed on in advance and privately.

THE SCORCHER

"I wish," said Mr. Chuggins, "that I had enough influence to get a job as a motor cop."
"So you could help with the traffic?" inquired his wife.
"No. If I were a motor cop I could burn the road to my heart's content without danger of being interfered with."

EARLY INCOME TAXES

The first income tax in the United States became effective in 1863, when a tax of 3 per cent was made on all incomes of more than \$600, and 5 per cent on incomes exceeding \$10,000.

It was in THE TERMINAL.

CUT SHORT HER ENJOYMENT

Self-Invited Guest's Error Excusable Under Circumstances, but Decidedly Embarrassing.

It is an established custom in our village to give garden parties for church and charitable organizations. I saw my neighbor stringing lanterns from the trees and placing tables on the lawn for an evening party. Later in the evening, when the lights were gayly swinging, I invited a friend to go over to the fête next door.

We seated ourselves at one of the tables, and as my neighbor approached I asked her what kind of ice cream they were serving. There was no choice, so I ordered two servings of vanilla and as the delicious white cake was passed I expressed a desire for chocolate.

We were nicely served and I was enjoying the party till I inquired of my neighbor what I owed her and she replied, "Oh, we were just having a little party in honor of my mother's birthday."—Chicago Tribune.

A MATTER OF FIGURES

Blackstone—Why did you fire that young bookkeeper? Couldn't he balance his accounts?
Webster—Yes! but he started to juggle them!—New York Sun.

NOTICE OF SHERIFF'S SALE.

Superior Court, City and County of San Francisco, State of California.
General Motors Acceptance Corporation, a corporation, Plaintiff, vs. A. L. Sweetser and Inez Sweetser, Defendants.
Under and by virtue of a writ of execution, to me directed, issued out of the Superior court of the city and county of San Francisco, state of California, on the 9th day of June, 1922, in the above entitled action, wherein General Motors Acceptance Corporation, a corporation, recovered a judgment against A. L. Sweetser and Inez Sweetser, which judgment was duly entered and docketed on the 8th day of June, 1922, for the sum of Seven Thousand Six Hundred Forty-Five and 61/100 (\$7645.61) dollars, damages, gold coin, with interest at the rate of seven per cent per annum, and \$18.65 costs, and accruing costs, I have levied upon and taken under execution all the right, title and interest which the said A. L. Sweetser and Inez Sweetser had, or held on the 8th day of June, A. D. 1922, or at any time subsequent thereto, in and to all those certain lots, pieces or parcels of land, lying and being in the county of Contra Costa, state of California, and described as follows:

Lots numbered One (1) and Two (2) in Block numbered Ten (10) as said Lots and Block are laid down, delineated and designated on that certain map entitled "Map of the Anderson Deposit Tract," filed in the office of the County Recorder of the county of Contra Costa, state of California on the 8th day of September, 1911. Being also a subdivision of the Rancho del San Pablo.

Together with all the improvements and appurtenances thereunto belonging. Public notice is hereby given that on Tuesday, the 10th day of December, A. D. 1922, at 12 o'clock noon of that day, in front of the courthouse, in the town of Martinez, county of Contra Costa, I will sell all the right, title and interest which the said defendants A. L. Sweetser and Inez Sweetser had or held on the 8th day of June, 1922, the day on which judgment was docketed as aforesaid, or which he may have subsequently acquired in and to the above described property, to the highest bidder for gold coin of the United States.

Dated Martinez, November 22, 1922.

R. R. VEALE,
Sheriff of Contra Costa County.
W. M. VEALE,
Deputy Sheriff.

SHERIFF'S SALE

In the Justice's Court, City and County of San Francisco, State of California.
D. A. Curtin, Plaintiff vs. David Hetzel, Defendant.
Under and by virtue of a writ of execution, to me directed, issued out of the Superior Court of the county of San Francisco, state of California, on the 27th day of October, 1922, in the above entitled action, wherein D. A. Curtin recovered a judgment against David Hetzel which judgment was duly entered and docketed on the 5th day of December, 1917, for the sum of one hundred sixty three and 03/100 (163.03) dollars, damages, gold coin, and \$2.65 dollars costs and accruing costs I have levied upon and taken under execution all the right, title and interest which the said David Hetzel, had held on the 5th day of December, 1922, or at any time subsequent thereto, in and to all that certain lot, piece, or parcel of land, lying and being in the county of Contra Costa, state of California, and described as follows:

Lot 9, Block 2 in Richmond Pullman Home Tract, Richmond, Contra Costa county, California, assessed to David Hetzel.

Together with all the improvements and appurtenances thereunto belonging. Public notice is hereby given that on Tuesday the 19th day of December, 1922, at 11 o'clock a. m. of that day, in front of the court house, in the town of Martinez, county of Contra Costa, I will sell all the right, title and interest which said defendant, David Hetzel had or held on the 5th day of December, 1922, the day on which said judgment was docketed as aforesaid, or which he may have subsequently acquired in and to the above described property, to the highest bidder for gold coin of the United States.

Dated, Martinez, Nov. 22, 1922.

R. R. VEALE,
Sheriff of Contra Costa county.
D. A. Curtin, Esq., attorney for plaintiff, Claus Spreckles Bldg., San Francisco, California. n 24-d-1-8-15

Boy—Does chewing tobacco spoil your teeth?
Old Man—Well, I've been chewing for fifty years and I have all the teeth I was born with.

During the first six months of this year applications for patents in the United States numbered 45,000, a figure in excess of all previous records.

NOTICE OF AGREEMENT OF SALE AND PURCHASE BETWEEN BANK OF RICHMOND AND MERCANTILE TRUST COMPANY, PURSUANT TO SECTION 31 OF THE CALIFORNIA BANK ACT.

NOTICE is hereby given that under date of Oct. 5, 1922, an agreement of sale and purchase was entered into, pursuant to Section 31 of the California Bank Act, by and between Bank of Richmond, a California banking corporation, having its principal place of business in Richmond, California, and Mercantile Trust Company, a like corporation, having its principal place of business in San Francisco, California, wherein the said Bank of Richmond agreed to sell and the said Mercantile Trust company agreed to purchase the business and assets of said Bank of Richmond, for and in consideration, among other things, of the assumption by said Mercantile Trust company of the payment in full, on demand, of all claims and liabilities to the depositors of said Bank of Richmond; and wherein it was further provided that any and all transfers of said deposits are and shall be subject to the right of every depositor of said selling bank to withdraw his deposit in full, on demand, after such transfer, irrespective of the terms under which said deposit may have been made with said selling bank; and

NOTICE IS HEREBY FURTHER GIVEN that said agreement was approved by the Superintendent of Banks on October 7, 1922, and that pursuant to permit duly issued by said Superintendent of Banks on October 9, 1922, said Mercantile Trust Company has established and is now operating a Branch Office in said premises heretofore occupied by said Bank of Richmond, in Richmond, California, as its main office.

Dated, San Francisco, California, Oct. 16, 1922.
MERCANTILE TRUST COMPANY.
